

Private Residence, Naples, FL

## Hammock<sup>®</sup> Centipede

Hammock<sup>®</sup> Centipede is an easy-care turfgrass for those who'd rather rest in a hammock than mow the lawn. Its slow growing features make Hammock<sup>®</sup> Centipede great for residential properties and municipal roadways. Plus, it requires significantly less water and less fertilizer than many other grasses. Meets Green Building standards.

### Benefits and Care of Centipede Grass:

- ▶ Drought tolerant.
- ▶ Requires less water than St. Augustine grass.
- ▶ Environmentally friendly.
- ▶ Hammock<sup>®</sup> Centipede is the ideal choice for those who want a low-maintenance lawn.
- ▶ Hammock<sup>®</sup> Centipede is more heat tolerant than other Centipede cultivars. It was bred in South Florida and developed for use as a residential lawn that can stand up to the summer heat.
- ▶ Mow as little as 6 times a year.
- ▶ Hammock<sup>®</sup> Centipede is so named because homeowners will spend a lot more time in their hammock than behind their lawnmower if they've got this type of turfgrass in their yard.
- ▶ Great for roadways and public lawns. Less frequent mowing saves on maintenance costs.
- ▶ Lower grass fertilization requirements.
- ▶ Finer texture than St. Augustine grasses.
- ▶ Darker green color than many existing varieties of Centipede.

Hammock<sup>®</sup> Centipede is available through Environmental Turf and its network of licensed growers.
